1. After logging into MyRED using NUID and TrueYou password (the same password that is used for FireFly), click on the Faculty tab.

2. To view your class rosters, click on the Class Roster tab.

3. The first class on your schedule will default on the Class Roster page. You can print your class rosters by clicking on the Print button.

4. Click on the class section link to immediately change the display to that section's class roster.
5. To display multiple class sections, click the checkboxes next to the sections that you wish to view. Then, click the Apply Filters button. When displaying multiple sections, the students will be grouped by the section in which they are enrolled.

6. Note: All of your sections are listed under the Class Roster tab, regardless of the course enrollment.
